#### **DETAILED ACTION**

## Response to Arguments

#### Claim Objections—Withdrawn

1. Claims 4, 5, 11, 12, 18, and 19 were objected to under 37 CFR 1.75(c), as being of improper dependent form. The amendments and arguments present overcome/obviate the objection(s).

## Response To Arguments

1. The remarks indicate that the claims, as amended "specifically recite the centrifugally operative structure." The recitation of the suggested structure is not in the claims, nor is any other structure that would overcome the rejection(s). The arguments are not persuasive except with respect to new claim 33.

### Claim Rejections - 35 USC § 112-Maintained/New

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 1-5, 8-12, 15-19, 31-32 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The manner in which centrifugal force is operative to produce the claimed effects is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The claims lack any biased structure or other centrifugally operative structure.

Application/Control Number: 09/747,660

Art Unit: 1746

- 3. As was previously indicated the claims recite so little structure (namely a shaft and a wafer backside plate and now a slot) that the claims fail to meet the statutory requirements for definiteness. While it has been argued that figure 16 illustrates the components of claim 1. This statement is not accepted because the claim fails to disclose a slot, a pin, and the interconnectivity of the components. The absence of any one of these critical components would justify this rejection. Also noted: no spring-biased pin recited. The arrow of the figure 16 clears op some ambiguity and in conjunction with the recitation in claim 33 appears to distinguish the claim from the prior art of record.
- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 33 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A wafer is referred to in the last line of claim 33, it is unclear how this wafer relates to, or interconnects with the apparatus, the problem is compounded because the claim apparently fails to actively recite the wafer elsewhere in the claim.

#### Conclusion

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 09/747,660

Art Unit: 1746

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Gentle E. Winter whose telephone number is (571) 272-1310.

The examiner can normally be reached on Monday-Friday 7:00-3:30.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Randy P. Gulakowski can be reached on (571) 272-1302. The fax phone numbers for

the organization where this application or proceeding is assigned are (703) 872-9306 for regular

communications and (703) 872-9306 for After Final communications.

8. Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (571) 273-1310.
